WHY

The surprise of
capability

HOW Reality-based learning

WHAT

The School Enterprise model

From Cartesianism to Realism: Reality Based Learning

Overcoming dualism.

‘from thought to the reality...’

vs

‘from the relationship with reality to the thought...’

School-enterprise, an opportunity for learning through experience.

Reality-based learning methodology of School Enterprise Model is based on

Create an integrated curriculum with **Academic, Life and Professional skills**

To set a School Enterprise model with **laboratories as workshops**

A better way to learn in VET in **work context**

Visualize the contents in the **real experience**

Improve the motivation understand the **utility of the contents**

The right way to **develop competences**

Develop competences (**due to they are developed in a real context by definition**)

Strenght of educative value of
work in real context

Some items about the value
added from the
reality-based learning method
difficultly offered by traditional
training

STUDENT PROTAGONISM: a real task

PERSONAL RESPONSIBILITY: participation in the adult world through work activities for the consolidation of the subject's personality

Strong **RELATIONSHIP** with the client

OBJECTIVE EVALUATION: the customer's judgement

CRITICAL CONSCIOUSNESS: the reformulation of one's actions from actual experience

SKILL DEVELOPMENT: facilitating the acquisition and memorisation of technical and professional skills

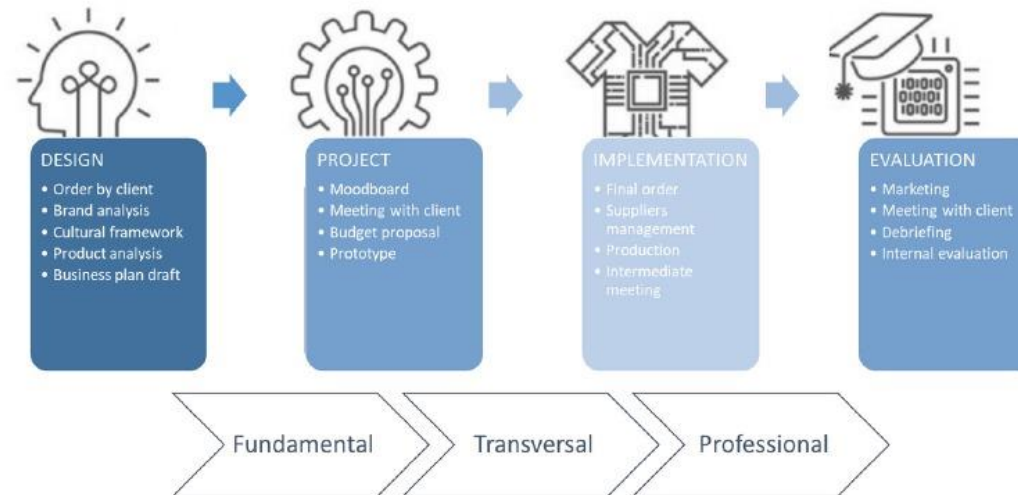

MOTIVATION to learn by approaching the purpose, reason for engagement

EDUCATIONAL BENEFITS: learning in the working environment

The **ECONOMIC DIMENSION** of one's work with its implications in terms of organisation of activities, time and resources

SOCIAL RECOGNITION: awareness of roles and opportunities

INSIDE THE PROCESS
